ABSTRACT

Objective of "Nila Diyawara" was to revive two public wells in despair and turn them into safe, useful assets. This would provide local communities with reliable, safe access to water for bathing.

PROJECT NEED ASSESSMENT

Benefiting Community	The local communities residing in Welawatta and Yakkalamulla.
Identified Community Need	The public wells in Welawatta and Yakkalamulla had fallen into disrepair and were filled with debris, stagnant water, and mud. This poor condition made the water sources unhygienic and unusable for the community to use for daily washing or bathing, effectively turning them into wasted assets.
Service Opportunity	The club identified that existing community infrastructure was sitting completely unused due to neglect. This presented an opportunity to revive a neglected public resource through physical restoration, including deep-cleaning, removing silt, and painting, to provide a direct, sustainable, and permanent benefit to the community
Mode of Data Collection	Direct visual observation by the club members, as the project was selected after noticing the poor condition of the unused infrastructure

SERVICE CONTEST FORM

Project Title	Neela Diyawara
Project Hosted By	Centennial Richmond College
Other Organizing Clubs	
Project Categories	1.Best Project for Infrastructure Development 2.Best Project for Clean Water & Energy Conservation
Date	2026-04-20
Venue	Welawatta Public Well, Yakkalamulla public well
Chief Guest	
Project Chairman	Leo Mevinu Gamage
Project Secretary	Leo Minuda Kalansooriya
Project Treasurer	Leo Sadeepa Weerasinghe
No. of Beneficiaries	1100
Project Value	13460.00 LKR
Mode of Funds Raised	Sponsorships
Participants	Leos: 8
Service Hours	98
Project Objective	Objective of "Nila Diyawara" was to revive two public wells in despair and turn them into safe, useful assets. This would provide local communities with reliable, safe access to water for bathing.
Project Description	Community Need / Requirement: The public wells in Welawatta and Yakkalamulla had fallen into disrepair. They were filled with debris, stagnant water, and thick mud, making them unhygienic for the community to use for washing or bathing. Neglection had turned these once useful wells into wasted assets. Project Selection / Idea Generation: The project was selected because we noticed that this existing infrastructure was sitting completely unused due to its poor condition. Reviving a neglected public resource would provide a direct, sustainable, and permanent benefit to the community.

Planning and Execution:

Phase 01 (Welawatta - April 11, 2026): We cleared surface debris, emptied and deep-cleaned the well, and painted the surrounding structures to protect the well and provide a clean look.

Phase 02 (Yakkalamulla - April 20, 2026): Following the successful first phase, We restored a second site in Yakkalamulla, removing deep silt deposits, cleaning the interior, and painting it for public use. During the process, a local resident, moved by our dedication, generously volunteered his personal JCB and his own time to assist.

Challenges Identified:

The main challenge was removing the hard mud layers at the bottom of the well. Years of neglect had created thick layers of silt and compacted debris that were difficult to extract by hand. The stagnant nature of the water required the removal of water for thorough cleaning and restoration, which required significant amount of hard work.

Solutions Implemented:

To address the heavy silt and pollution, our members manually removed the thick layers of mud and debris. For this, we used brushes to vigorously scrub the walls, removing all the slime and stains. A volunteer used a JCB to clear overgrown brush and debris around the well. Finally, to finish it off and make it more pleasant, we painted the exterior walls, and let the well to be refilled with natural water flow.

Contribution from Leo Club Members:

This was an effort directly contributed by our members. From scrubbing the interior with brushes to painting the surrounding structures, members contributed to all aspects of the restoration. The success of this project was due to their extensive efforts.

TREASURER REPORT

	Record ID	Value (LKR)
Income		
Total Income		0.00
Expenses		
Neela Diyawara Phase 01 expenses	85027	7,370.00
Neela Diyawara Phase 02 Expenses	85032	6,090.00
Total Expenses		13,460.00

Note: Record ID is related to online administration system (MYLEO) of Leo Multiple District 306, Sri Lanka.

CENTENNIAL LEO CLUB OF RICHMOND COLLEGE

01.05.2026
To whom it may concern,

Confirmation of Successful Completion of Project "Nila Diyawara" (Phase 01)

This letter serves to formally confirm that the Centennial Leo Club of Richmond College successfully completed the community service project "Nila Diyawara - Phase 01" on April 11, 2026, at the Welawatta Public Well.

The project, which involved the restoration and cleaning of the public well infrastructure, was conducted with the full permission and prior knowledge of the administration of Richmond College, Galle. The initiative was concluded effectively, achieving its objective of providing the community with a safe and hygienic water resource.

Thank you.
Yours Sincerely,

 Leo Minnu Gamage,
President,
Centennial Leo Club of Richmond College.

 Leo Minuda Katarasooriya,
Secretary,
Centennial Leo Club of Richmond College.
