● About the Project

Project "Reshade" was conducted to restore the Hapugala Scout Campsite, a public asset dedicated to youth development. The need for this project was identified first while we were at the Galle Scout Headquarters for our "Impact Ink" book donation project, in which we donated books to newly established library at Galle scout headquarters. Upon learning that the campsite had fallen into a state of total neglect, we decided to reclaim the site to ensure the Scouts, a public non-profit organization, had a safe and functional environment for their activities.

1. Project Objective

The objective of the project Reshade was to clean and restore the Hapugala Scout Campsite. By rehabilitating this neglected public resource, we aimed to provide a proper place for local scouts to conduct their expeditions and training.

2. Project Description

➤ **Community Need / Requirement:**

As a public organisation focused on character building, the Scouts rely on dedicated outdoor grounds. However, their Hapugala campsite had become unusable due to long-term negligence. The site was heavily overgrown, turning a valuable public resource into a waste of space. There was a need to restore the campground to make the site fit for scouting use once again.

➤ **Project Selection / Idea Generation:**

The selection of this project was a direct result of our engagement with the Scout community. While working at their headquarters for our project Impact Ink, we realised that a valuable facility of this public organisation was being lost due to neglect. We chose this project because reviving an existing public asset offers a more sustainable community benefit than starting something new elsewhere.

➤ **Planning and Execution:**

The project took place on April 18, 2026. To get everything done on time, we worked according to a plan. First, we trimmed overgrown grass and pruning trees to clear the area. We got rid of the weeds and creepers that had grown up the existing buildings and filled in the burrows to make sure the ground was safe and level. After that, we cleaned the area by scrubbing the walls and clearing it again to make sure the site was fully restored.

➤ **Challenges Identified:**

The main challenge was how thick the grass and bushes had grown. Years of abandonment had allowed dense brush and weeds to take over the camping areas. Clearing this by hand to ensure the site was safe and sound for scout activities is really tiring.

➤ **Solutions Implemented:**

We used different tools, like lawn mowers, to cut and trim the overgrown grass. We collected all hazardous items and debris from the camping site and filled in ground holes. Then, we scrubbed the walls and interiors of the existing buildings, removing grime and buildup, transforming it back into a clean, functional scout facility.

➤ **Contribution from Leo Club Members:**

Members took the initiative of this project along with the assistance of scouts. We cleared the land, pruned the trees, cleaned the buildings, and swept the site. Every Leo who was involved helped bring the campsite back to life for the scouts.

3. Conclusion:

Project "Reshade" successfully restored an campsite belonging to Galle Scout headquarters that had been lost to the elements due to neglect. By clearing the shrubs, pruning the trees, and cleaning the buildings, we provided the Scouts with a cleared ground ready for use

Description
The Hongkong Scout Campsite is a vital space for scout youth, but it had fallen into total neglect. Overgrown with thick bushes and creepers, it was no longer safe or usable for scouting activities. We started project "Rehabade" to reclaim the grounds and make the site functional again.

On April 18, 2020, our team spent the day clearing the property. The main challenge was the dense overgrowth and uneven ground, which made the work physically demanding. Our members mowed the long grass, pruned the trees, and thoroughly scrubbed the campsite buildings to get them back into shape.

By the end of the day, the area was completely transformed. The campsite is now clean, safe, and ready for local scouts to use for their training and expeditions, restoring a valuable resource to the community.
