● About the Project

The "Stop Swap" was an infrastructure renovation project focused on the Kumarakanda Bus Stop. We recognized that the bus stop had fallen into a state of decay, we stepped in to do a full restoration. The project aimed to fix the roofing and repair the structure to ensure that commuters in the Kumarakanda area have a clean and weather-proof shelter while waiting for their bus.

1. Project Objective

Our objective for 'Stop Swap' was to renovate the Kumarakanda Bus Stop to provide a safe and reliable shelter for the commuters. By reroofing and restoring the facility, we aimed to eliminate the inconvenience faced by commuters during adverse weather conditions and improve the overall safety of this public asset.

2. Project Description

➤ **Community Need / Requirement:**

The Kumarakanda Bus Stop is a transit hub for local residents. However, the existing structure was in a severe state of disrepair and vandalism. The roof was missing and no longer provided protection from the rain and walls were filled with graffiti. This left daily commuters exposed to the elements, making the simple act of waiting for a bus a tiring and often uncomfortable experience.

➤ **Project Selection / Idea Generation:**

This project was selected because we couldn't ignore how bad the bus stop had gotten. After observing the sorrowful state and clear physical deterioration of the Kumarakanda Bus Stop, we decided that a renovation could restore the facility's functionality and serve hundreds of people daily.

➤ **Planning and Execution:**

The renovation was carried out on April 21st, 2026. The process began with the scrubbing off of graffiti. Our members then worked alongside local supporters to install the new roofing. Afterwards, we performed a deep clean of the interior and exterior walls and floor, preparing the site for public use.

➤ **Challenges Identified:**

The main challenge was the difficulty of working on a busy main road. Coordinating the safety of both our members and passing commuters while handling heavy roofing materials, Additionally, obtaining the sheets for the new roof was also a significant logistical and monetary challenge.

➤ **Solutions Implemented:**

We managed the site safety by being careful monitoring and keeping a safe distance from the vehicles. The project benefited greatly from unexpected community involvement. Upon seeing the Leos at work, a nearby hardware store assisted us in securing the necessary roofing sheets, and locals, moved by our initiative, provided their assistance free of charge. This local collaboration allowed us to complete the renovation more efficiently and safely.

➤ **Contribution from Leo Club Members:**

This was an effort directly contributed by our members. From scrubbing the interior with brushes to painting the surrounding structures, members contributed to all aspects of the restoration. The success of this project was due to their extensive efforts.

3. Conclusion:

The "Stop Swap" project has turned a decaying, roofless structure back into a proper bus stop for Kumarakanda. By replacing the roof and cleaning up the vandalism, we've made sure that the hundreds of people who use this spot daily no longer have to stand exposed to harshness of elements.

Description

The Kumarakanda Bus Stop had fallen into terrible condition. With a missing roof and walls covered in graffiti, people waiting for the bus were left completely exposed to the sun and rain. We launched "Stop Swap" to revive it and transform it to a safe, clean waiting place for commuters.

On April 21, 2026, our team took on the renovation. The main challenge was safely working right next to a busy road while handling heavy materials. Our members scrubbed off the old graffiti, deep-cleaned the entire structure, and successfully installed a brand-new roof with some great help from local community volunteers.

The transformation was a huge success. We turned a vandalized, roofless bus stop back into a proper bus stop, ensuring a much more comfortable and dignified daily commute for hundreds of locals.
